

7313 William Barry Blvd., North Syracuse, NY 13212

ICM Controls has recently introduced their latest product, the Universal Functional Programmable Timers.

At the AHR Expo, ISO Certified manufacturer of electronic controls, ICM Controls will display their UFPT Timers, which could replace more than a hundred legacy timers.

FOR IMMEDIATE RELEASE

Chicago, IL- 01/22/2024 - ICM Controls is excited to showcase the UFPT Timers, a versatile and programmable solution for preventing compressor short cycling and staging. These multifunction Universal Function Programmable Timers are featured at the AHR Expo Tradeshow in Chicago, IL.

ICM Controls, a prominent US manufacturer of control boards for HVAC-R appliances, prioritizes compliance with safety regulations to ensure the secure operation of all appliances.

These Universal Timers have been carefully crafted to accommodate a wide range of timing functions. The ICM-UFPTs feature a comprehensive selection of timing functions, including On Delay, Interval, Anti-Short Cycle, Repeat Cycle, Off Delay, and Single Shot. These functions are widely recognized and highly sought after by HVAC technicians and contractors.

Furthermore, the user can easily apply the updated set-points to the device wirelessly, saving time and effort. Thanks to near-field communication (NFC) technology your phone can quickly transfer data through the antenna and program units on the fly without the need for Bluetooth or wi-fi connection. This cutting-edge innovation allows you to effortlessly adjust and personalize your preferred time delay relay through your cell phone. With the ICM-UFPT Timers, you can easily set up and fine-tune these universal timers.

Included in the UFPT Series is a 5 Amp dry contact output relay that allows for direct control of a load. With its universal voltage and multifunctionality, this product is designed to work seamlessly in any setting, making it a versatile and convenient item to have in stock. As a result, these Universal timers are suitable for a wide range of applications.
